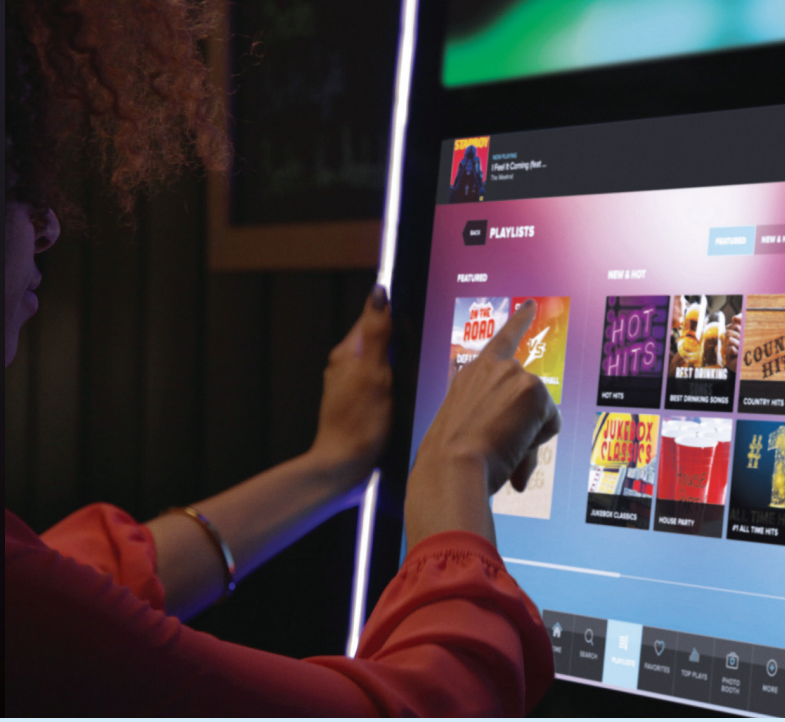
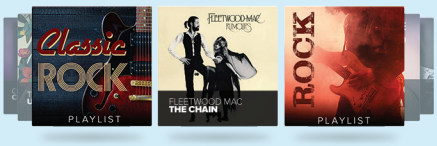
OpenStage 2 music profiles

TouchTunes OpenStage 2 software allows locations to choose from a variety of Music Profiles that cater to the musical preferences of each venue. Music Profiles are designed to promote relevant songs and artists on the homepage, as well as through a selection of featured playlists that can be found in the Browse section. Operators can work directly with locations to identify the right Music Profile to suit each venue's needs, helping boost engagement and drive revenue.





Rock Mix

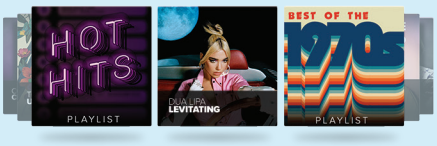


Chart Toppers

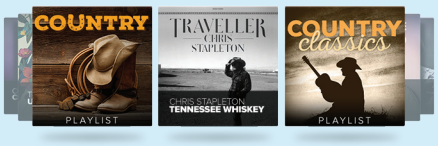

Country Mix

Available music profiles
